Sushma-Kummari Sushma-Kummari

PROFILE

Data Analyst with 1.5 years of experience in leveraging SQL, Python, Power BI, and Tableau to deliver actionable insights, automate workflows, and support data-driven decision-making. Skilled in cloud-based analytics, retail media KPIs, and cross-functional collaboration.

EDUCATION

University of North Texas Aug 2023 – May 2025 | Denton, Texas
Master of Science in Advanced Data Analytics
Relevant Coursework: Data Programming (Python, R), Machine Learning, Healthcare Data Analytics, Visualization (Power BI, Tableau), Statistics.

EXPERIENCE

TRIO Home Care Jul 2025 – Present | Denton
Data & Program Support Volunteer
Designed interactive Power BI dashboards by integrating patient intake and service data, streamlining care operations, and improving resource allocation by 20%.
Automated reporting workflows using Python, SQL, and Excel, reducing manual effort by 12+ hours weekly.
Developed and tracked campaign KPIs using SQL and Tableau, optimizing outreach strategies.
Built ETL pipelines for extracting and transforming service data into analytical models using GCP BigQuery.

University of North Texas Aug 2024 – Dec 2024 | Denton
Graduate Teaching Assistant
Delivered workshops on SQL, Tableau, and Python using real-world healthcare datasets, improving student project success rates by 30%.
Introduced cloud-based analytics (AWS/GCP) and visual storytelling to enhance student learning.

SKILLS

Programming & Tools: Python, SQL, Excel (Pivot Tables, Macros, Power Pivot), Tableau, Power BI (DAX, Power Query, Power BI Service), Jupyter, Git, Polars, PL/SQL, Apache Spark (Streaming), Databricks, Metabase, DBT, Meltano, Looker, Mixpanel, Amplitude, Google Analytics, PowerSchool, Schoologytics

Cloud & Big Data: AWS (S3, Redshift, QuickSight), GCP (BigQuery, Clean Rooms), Azure Data Factory (ADF), Snowflake, Data Warehousing Concepts

Analytics & Modeling: ML Pipelines, Regression, Classification, Clustering, A/B Testing, KPI Monitoring, Campaign Performance Analysis, EDA, Statistical Pattern Recognition, Predictive Modeling, Hypothesis Testing, Education Performance Metrics, Data-Driven Instructions

ETL & Integrations: SQL-based ETL pipelines, API integrations (e.g., Meta), Talend (basic), Informatica (basic), Clever, DeansList

Visualization & Reporting: Dashboard Design, Data Storytelling, Stakeholder Presentations, Client Reporting, Interactive Report Automation, Real-Time School Dashboards

Soft skills: Problem-solving, Stakeholder Management, Team Collaboration, Attention to Detail, Communication, Training & Support

Certifications: Microsoft Certified: Data Analyst Associate, AWS Certified: Academy Graduate Data Analytics

PROJECTS

AI Patient Trust & Sentiment Dashboard 2025
Designed and analyzed a public survey on AI symptom checkers using RoBERTa and KeyBERT for sentiment and keyword extraction.
Built Power BI dashboard with word cloud visualizations to present insights on trust and communication needs.

Allegheny County Crash Analysis 2025
Developed a full-stack solution using clustering, ARIMA/SARIMAX, and Random Forest to analyze traffic crashes.
Used GCP BigQuery and Python for processing and visualizing seasonal crash trends; influenced local policy changes.

Conditional Cash Transfer (CCT) in the Philippines 2024
Merged healthcare and financial datasets to evaluate outcomes of conditional cash transfer programs.
Built and automated ETL pipelines using SQL/Python; visualized insights using dashboard tools for non-technical stakeholders.
